- **PARTICIPATION** Bring a web-enabled device to each class to access TopHat. You will be asked questions in some of the classes (2 points each: 1 for correctness, 1 for any

answer). 80% of the total possible points earns full credit for participation. This means you can miss up to 20% of the points and still get 100%.

- **QUIZZES** are take home.
- **Knowledge Tests** consist of 8-10 quiz questions per chapter. These quizzes have unlimited attempts, no time limits, and must be completed by 4/25/2025.
- **FINAL** is in person (Hard Copy notes allowed, limiting to 4 letter size pages counting both sides)
- **All Projects and Homeworks have same deadline 04/25/2025**
- **Please submit the final version of your project only, only one submission is allowed. Once your project is graded you cannot fix your project for regrading.**
- **PROJECTS** are assigned in a group. You should form a group within the second week of the start of the class. You are supposed to stick with the same group throughout the course.

Prerequisites: C or higher in CS 1428: Foundations of Computer Science I

Course Objectives:

At the end of the course, the students should be able to:

1. Describe and demonstrate at least two different algorithms for searching and at least two different algorithms for sorting.
2. Implement a divide-and-conquer algorithm to solve an appropriate problem (binary search).
3. State the time/space efficiency of various algorithms (using one of 6 categories of mathematical functions).
4. List the 6 categories of mathematical functions used in analyzing algorithms in order from slowest to fastest growing.
5. Read and write C++ code that uses pointer variables and memory operations (new, &, *, delete), including pointers to arrays, structures, and objects and the -> operator.
6. Write C++ code that resizes an array using dynamic memory allocation.
7. Write C++ code that deletes dynamically allocated memory to avoid memory leaks.
8. Describe the basic concepts of object-oriented programming.
9. Design, implement, test, and debug simple programs (using objects) in an object-oriented programming language (C++).
10. Describe how the class mechanism supports encapsulation and information hiding.
11. Develop (implement) programs using multiple classes and arrays of objects
12. Develop and use appropriate algorithms, especially for processing lists (insert, remove, search, sort, etc.)
13. Describe structured programming in terms of modules and functions.
14. Develop (implement) programs with source code separated into multiple files, including header (.h) files
15. Create, compile, and run a C++ program in a unix style command-line environment
16. Develop (Implement) C++ programs that create and use simple linked-lists, including code to insert into, delete from, and traverse a linked list structure.
17. Compare and contrast the costs and benefits of dynamic and static data structure implementations.
18. Describe the principle of the Abstract Data Type (ADT) and, in particular, explain the benefits of separation of interface and implementation.
19. Implement user-defined data structures in a high-level language.
20. Implement the list, stack, and queue ADT using arrays and linked lists.
21. Write programs that use each of these data structures: linked lists, stacks, and queues.

Makeup Policy:

Missed participation (TopH and daily quizzes) and TESTs cannot be made up.

Notifications from the instructor:

Notifications related to this class will be either:

- sent to your Texas State e-mail account (be sure to check it regularly) OR
- posted in Canvas under Announcements (set up your Canvas notifications properly).

HELP:

Other than the instructor's office hours, there are other places to obtain assistance:

- **CS Lab tutors** (good for help on Programming Assignments):

<https://cs.txstate.edu/resources/labs/tutoring/>

- **CLC tutoring** (good for help on understanding the material):

<https://hlsamp.cose.txstate.edu/clc/clc-tutoring.html>

- **If you received a C grade in CS 1428 I expect you to attend one SI session per week.**

Withdrawals/drops:

You must follow the withdrawal and drop policy set up by the University:

<http://www.registrar.txstate.edu/registration/dropping-or-withdrawing.html>

For rest of the deadlines regarding withdrawal please use university calendar

<https://www.registrar.txst.edu/registration/ac/academic-calendar.html>

Accommodations for students with disability:

Any student with needs requiring special accommodations should contact the office of disability services at the LBJ student center (5-5.1). Students who qualify for extra time for exams must take their test with ATSD and must schedule their test at the same time the test is given in class. Note: you must submit your request with ATSD at least 2 business days before the exam date!

Statements from the University on:

Classroom Civility, measures for health, wellness, and safety, the Bobcat Pledge, and compliance with health standards: See course home page on Canvas for these.
